

# MAGNUM\*

The latest release from Marionnet  
approved by the growers, adored by the consumers

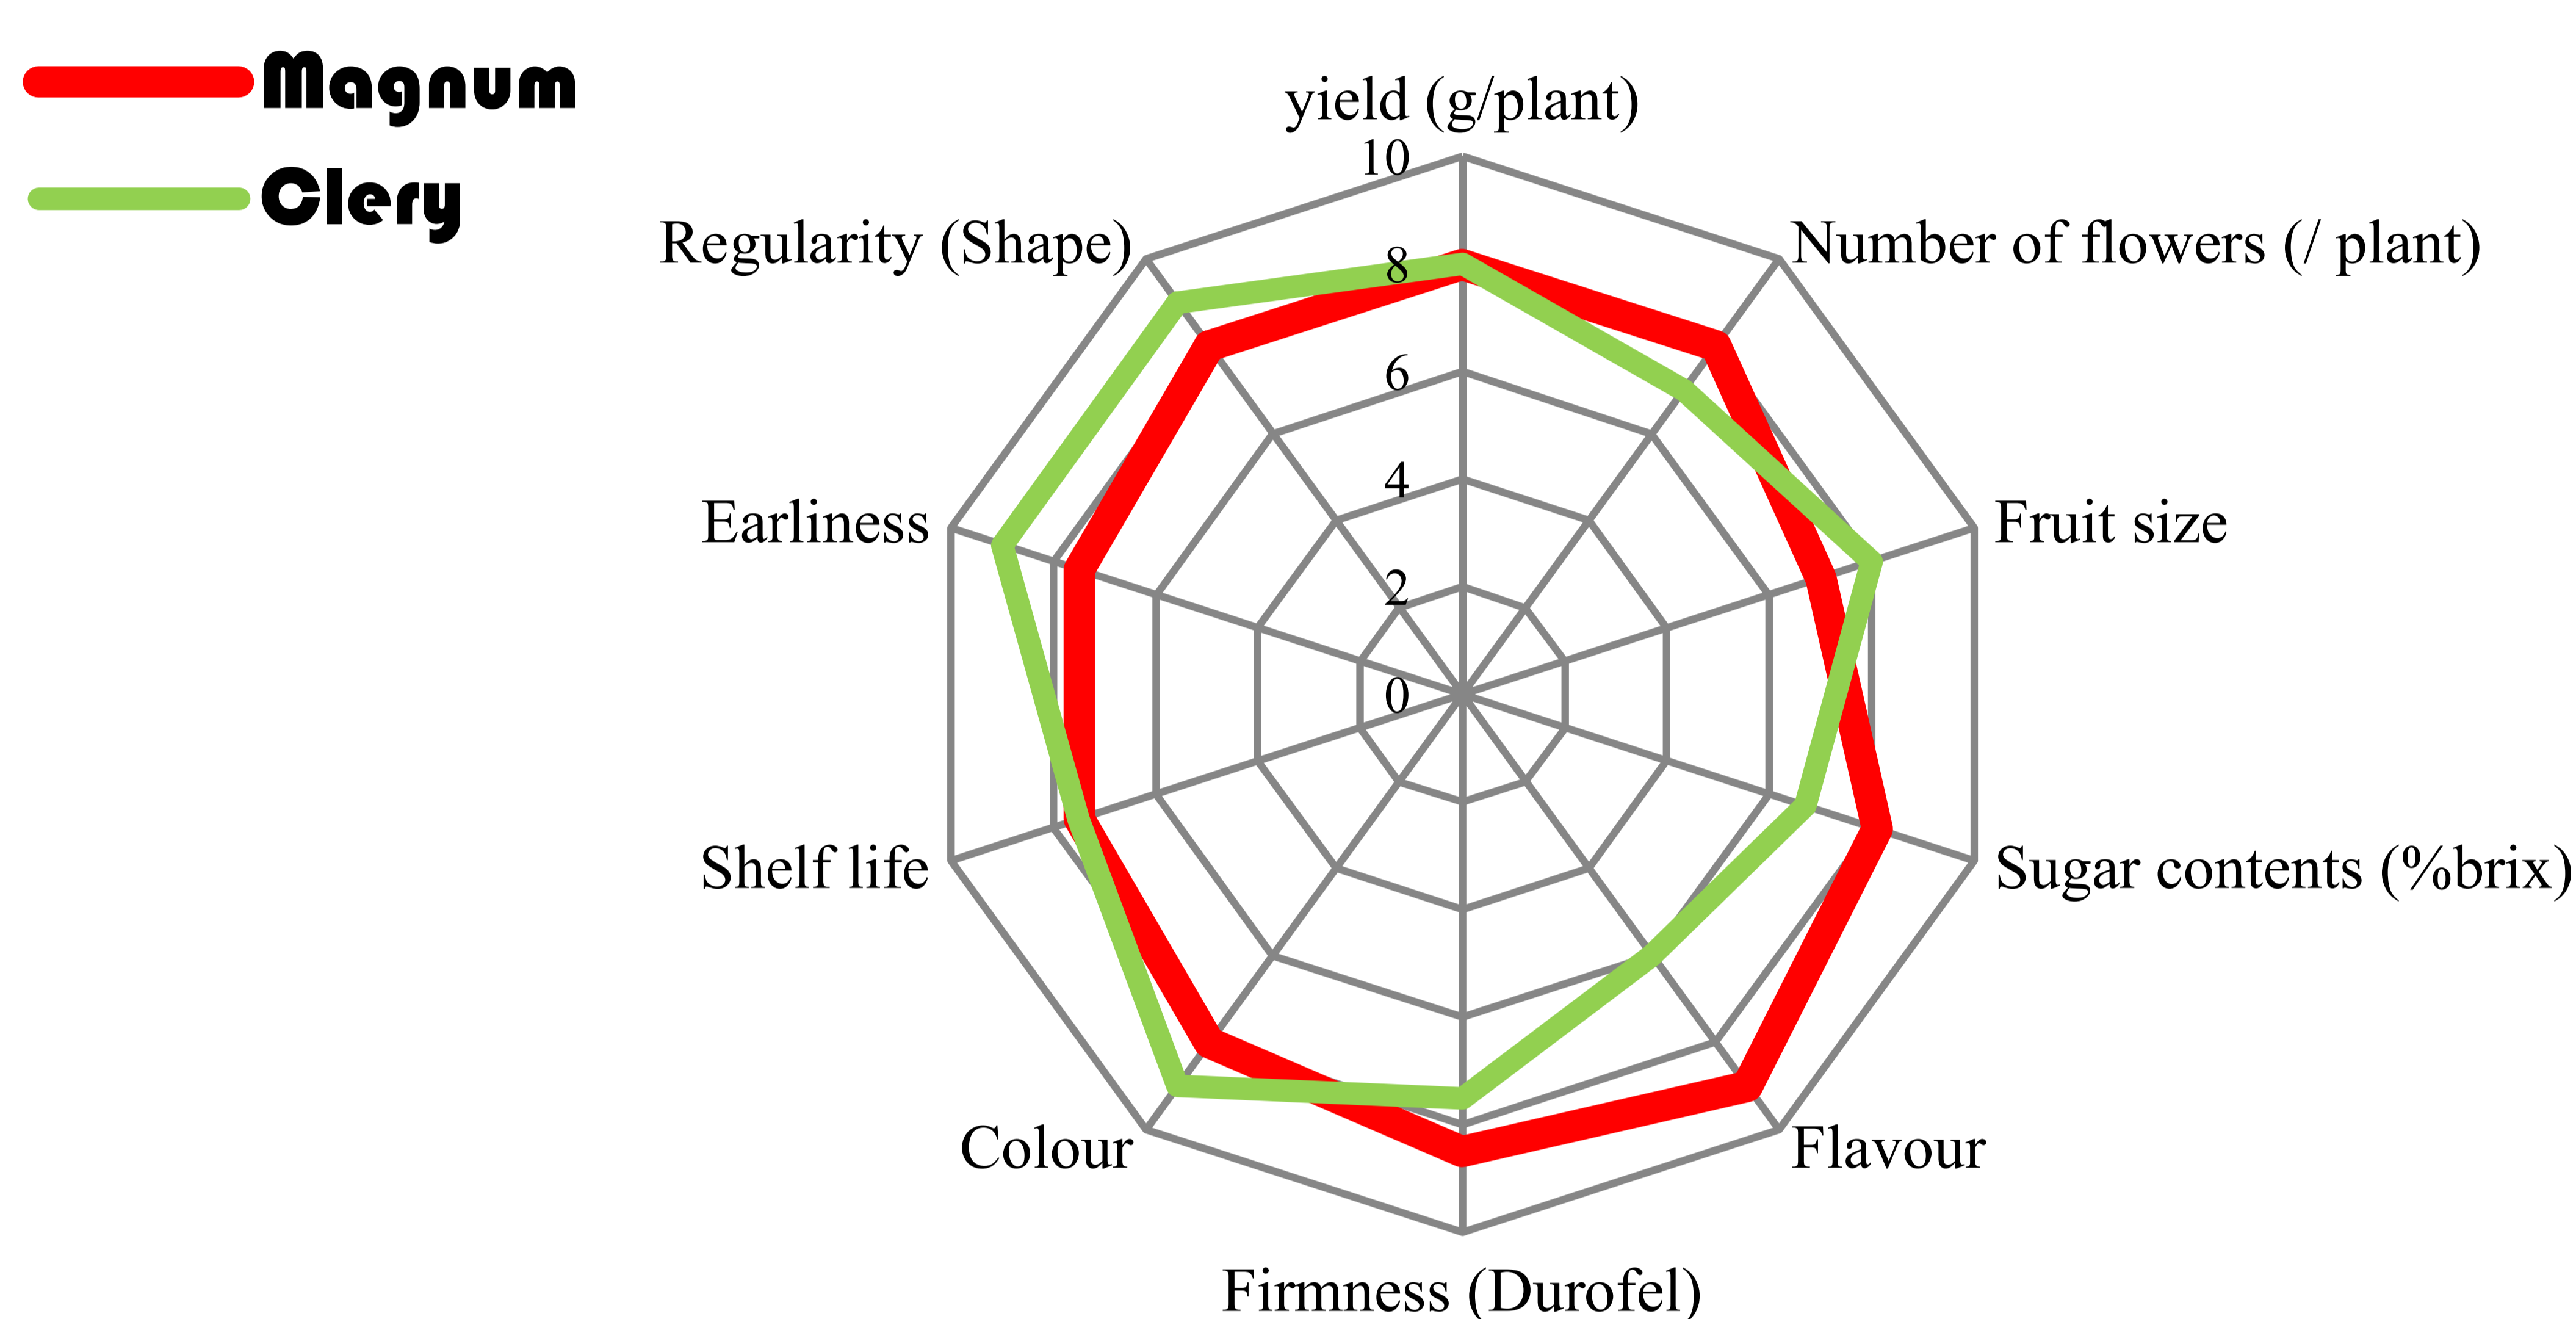

- June bearing variety  
Mid early – Mid season
- Large fruit (average 25 g)
- High yield
- Adapted to table tops  
and soil culture
- Very sweet (high Brix level)
- Excellent taste
- Good firmness and shelf life

\*Magnum : EU PVR dénomination = Marionnet 97

## Results (2015) Proefcentrum Research Centre Hoogstraten Belgium.

Glass house trial, Tray plants: 16-12-2014

## Results and comments (2015) of UK growers

	Type of plant / Production system	Planting date	Gms/ plant class 1	Total Yield
grower 1	Tray plant/ Grown in coir on table tops in tunnel	15.03.15	630	745
grower 2		16.03.15	579	631
grower 3		07.04.15	578	578

Comments UK growers (Kent) :

First month 90-95% Class 1, then 85-90% for the second half. **So overall very good Class 1 yield.**

**Superb flavour**, great shape and size. Seems tolerant to soil borne disease when compared to Elsanta. Everyone who tried them loved them.

Nice fruit without being **exceptional in flavour**. Good handling ability.

## Results (2015) Experimental Station. Brittany. France

Plantation of Tray plant on table tops in glasshouse

Planting date	Period of cropping	Commercial yield		% of Class I	Fruit weight
		g/m <sup>2</sup>	g/plt		
Week n° 05	28/04 - 09/06	4571	731,4	93	19,3

## Results (2014 and 2015) French Marionnet trials site

Plantation of Tray plant on table tops in tunnel (plastic tunnel)

Variété	Planting date	First picking date	Total yield (g/plt)	Yield Class I (g/plt)	Fruit weight (g)
Magnum	04/02/2015	4-mai	598	434	20
Cléry	04/02/2015		350	318	22
Magnum	06/02/2014	7-mai	695	556	19,1
Elsanta	06/02/2014		470	390	19,3

“Magnum : a sugar bomb”
